# ROARD OF ASSISTANT ALDERMEN.

The Fees of Collector of Assessments-Election of a Sergeaut-at-Arms. The Board of Assistant Aldermen met at two p'clock yesterday a ternoon, twenty-one members

being present. After the adoption of the minutes a report was read from the counsel to the Board in answer to a resolution adopted at the last meeting calling for his opinion as to the power of the Board to fix the number and salaries of its officers.

The opinion is very full, citing many authorities, and is to the effect that the Board may appoint its orders, but the Board of Apportionment must de-cide on the question of salaries. It concludes as

Jam, therefore, of the opinion that your Board has power to increase or diminish the number, or its officers at pleasure, provided that the salaries of such officers do not exceed the appropriation made therefor; and that the power 40 increase or diminish the salaries of the officers of your Board is rested exclusively in the said Board of Apportion-

# "THE MAN WHO LAUGHS"-WHY DOES HE

NEW YORK, Jan. 29, 1572.

TO THE EDITOR OF THE HERALD:DEAR SIR-In looking over your edition of the 27th inst. I see by the account you gave of the meeting of the sub-committee on the Fourth Avenue Railrond, at the Grand Central Depot, that Mr. Van-derbiit laughed. What did he laugh at? Was it derbit laughed. What did he laugh at? Was it the killing of our citizens and depriving their little Jamilies of a home and father? He says, according to the account, that he wants to be let alone. If he be left alone I mistake if his conscience does not trouble him the rest of his life. As for the Grand Central Bepot, it is a grand nuisance, together with the buildings required for railroad purposes surgounding it; not speaking about the right any corporation has to shut up any street heretolore taken from our citizens for a public road or street without from our citizens for a public road or street without recombense, and sold by a corrupt authority without combines, and sold by a corrupt authority without consulting the people, who are the power; and, sooner or later, Mr. anderbilt or his successors will find out that citizens have fights which corporations, no matter how wealthy, are bound to respect.

Proposed Change in the Board-The Pres Proposed Change in the Beard—The Presidents of the Irish and German Benevolent Associations to Be Thrown Ost—The Scriems Objections to the Bill Before the Legislature—What Richard O'Gorman Says.

Among the many bills covering and intending thousands of changes in the various departments of our city government now before the Legislature there are several, to say the least, peculiar in the manner which they propose to carry out the work of reform—a matter at this time predominant in the minds of all honest and law-abiding citizens. Contemplating the great good which such acts will accomplish, the legislators, feeling they must

accomplish, the legislators, feeling they must change all commissions and remodel every depart-ment in New York under their control, are now trying their hands on the Commissioners of Emi-gration. A bill has recently been presented in the Assembly having for its object an entire change in this important and necessary body; and while, perhaps, an improvement might be made in the commission as now formed, the bill provides for the removal of the Presidents of the Irish and German benevolent societies—just the very members of the Board whose connection with it are demanded by every consideration of right and justice to the poor emigrant that steps upon our

These gentlemen, above all others in the Board, are familiar with the wants of the poor strangers when they first appear among us, and, allve to the responsibilities of their position, have at all times been the most active of its members. There could not possibly be a more decidedly wrong step taken by the Legislature than the bassage of such a bill, and it is to be hoped that the Assembly committee that will to-morrow meet in Albany to consider its provisions will weigh with unusual seriousness all that portion having the retirement of these officials in view. Each year the Irish Emigrant Society and the German Society elect their Presidents, and they are selected because of their finess to carry out the benevolent objects of the associations. Political chicanery, happily, has not as yet disturbed or retarded the measure of their good, and it i this character of men that should compose the commission. The removal of these gentlemen from the Board would, undoubtedly, leave it in the hands of politicals alone; and if there is a department that should be exempt from such debasing influences it is this. Really, the committee allued to have much to reflect upon before they consent to the proposed change; but while they are about it, isn't there some way to take the other track, and in the interests of reform remove from the Board all of its partisan characteristics? Who could more fully appreciate the necessities of the emigrant than a commission mainly composed of the leading officials of benevolent associations? and who could more justly administer to their wants?

Learning the intention of the duly authorized committee of the Assembly to have its first session to-morrow for the purpose of considering the provisions of this bill, a Herald reporter called upon Mr. Richard O'Gorman yesterday, at his law offices, for the purpose of ascertaining his views upon this lil-advised movement. Mr. O'Gorman's long connection with the commissioners of Emigration and consequent familiarity with the supprise that such a moveme

Non-Society Men at Work, and Business Ur interrupted-The Dispute as It Originated. and What Came Of &-Merchants Relusing

to Comply with Trades Union Demands.

The excitement created in mercantile circles by the strike of the coopers has partially subsided, and aithough there appears to be a determination on the part of the self-sacrificing strikers to maintain a spirit of aggression and independence, the mer-chants who employed them, having obtained competent help for all the purposes of their business, seem to regard the affair as a

PERIODICAL REULLITION
of stubbornness to which they did not intend to submit. In many of the packing houses where the services of coopers were required what are known as society men, following the mandates issued by their organization, bundled up their implements and left, with the view of impeding and to some extent paralyzing the business of the several estab ishments in which they were engaged, and the vacancies thus created have been filled by other workmen not connected with any trade associa-tion. The strike, as previously mentioned, origi-nated in the house of Messrs. Wilcox & Co., Washington street. Convinced from careful observation and some loss that many of the coopera employed did not perform their days' work, or rather feiled to execute it with proper care, it was deemed advisable to furnish each man with certain who the delinquents were, since, on several occasions, the cooperage had been found defective. The numbering, of course, would have made no difference so far as the wages were concerned, as each man was paid \$3 per day. Such a course bet

The numbering, of course, would have made no difference so far as the wages were concerned, as each man was paid \$3 per day. Such a course being entirely opposed to the rules of the organization a strike was commenced. As business could not be suspended, however, the services of other coopers, non-society men, were summoned. The response was prompt, and several nouses in washington street. Baving filled up their lists, are working as smoothly as if nothing had occurred, indeed, so lar as they are concerned, the action of the striking coopers is regarded with Commandative of the action of the striking coopers is regarded with contractive of the establishments vesterday, and was informed that a large number of coopers heretofore engaged as truckmen, who, owing to their unwillingness to join a trade union, had been compelled to adopt another means of livelihood, and filled all the vacancies left open by the strikers. No further trouble is anticipated. When this strike was commenced it seems that entorts were made to induce men from working in some of the establishments, but without effect, and at present all the packing houses are supplied with efficient workmen, in regard to the statement made by Mr. Greenau, executive officer of the Manhaitan district, that witcox & Co. wanted to reduce the men's work to piecework, an emphatic denial is given by the firm. Mr. Rogers, the superintendent of the concern and one of the partners, states that the object in furnishing the men with unmbers was simply to discover those who were incompetent to perform their work, since, in several instances, they had sunered loss in consequence of the tierces breaking, because of Carkless And inseptication of the man was paid \$3 a day, and some, he said, were not worth \$1. The firm, he went on to say, should not be compelled to employ people who were worthless, Losses had been sustained by breakage, and it was absolutely necessary to discover those who were unable to perform the work. # ACCIDENTS ON THE RIVER.

The stiff nor'west gale of yesterday raised con siderable of a sea on the rivers, making it somewhat risky for the smallboatmen to venture out in their frail craft. A boatman named Ginitz, started from the Battery with 1,700 lbs. of meat for Governor's Island, and, when a most half way, his boat swamped, causing him to lose all his freight. The swamped, causing bim to tose all his freight. The meat belonged to Evans & Co., and was valued at \$130; the boatman was rescued by a passing tig. Another accident occurred at about the same place in the atternoon, about four o'clock, as the steamboat Governor's Island, which plies between the Battery and Governor's Island, was on her way to the island she was run into by a fishing smack, carrying overboard the steamer's pliot house and doing other slight damage. The pliot had a very narrow escape from serious injury. Several passengers were on board at the time, but no one was hurt. The boat was taken in tow by a tug and moored in the Atlantic basin. The smack sustained no damage.

THE NORTHEEN PACIFIC RAILWAY LOAN.

We notice in several of our Western exchanges an intimation that, owing to the alleged sale of Northern Pacific bonds in London, it is probable that the agents of that line will feel justified in withdrawing the present 7-30 bonds and substituting a 6 per cent loan. In view of the fact that the bonds were offered in London at a price equal to less than 90 per THE NORTHERN PACIFIC BAILWAY LOAN. cent in our currency it is hard to understand this matter; we beg to suggest that the Northern Pacific agents might give the quietus to ugly rumors connected with this operation by giving some explana-tion. Is it, or is it not, the truth that the British public have been offered these bonds at 90, which they are attempting to foist on our own people at par? The cable brought us word the other day that tne Northern Pacific lean of four millions sterling (\$20,000,000) had been successfully placed by the London agents of the road. By reference to our London flies of papers we see that the bonds were offered at 85 per cent, less 5 per cent per annum to those who paid cash instead of subscribing in in-stalments. GOVERNMENTS STRONG.

The government list was unsettled and weak early in the day in consequence of a sharp decline in our securities in London, where, as will be seen by our cable despatches, general depression was oc-casioned by less happy anticipations of a peaceful solution of the questions before the Geneva Confer-ence in connection with the Alabama claims. A rise in gold adjusted our market later in the day, induced considerable activity and restored its strength, particularly in the 1862's. The new loan was exceptionally heavy. GOLD STRONG—109% A 110.
The gold market, which is still in the hands of the recently organized clique, was strong on the fortuitous intervention of the decline of our bonds in London, referred to in the previous paragraph. But the parties, after letting the price advance to 110, dropped it to 109% on sales to realize their profits, and in furtherance of a general programme of "milking the market" and keeping the short interest alive. The most sanguine "bull" does not look for any such fluctuation in gold as is usual in the stock market, unless in the event of a foreign war, and hence, to make it profitable, there must be a good deal of "milking" done in a gold speculation nowadays. Intermediately, however, this prospect of war was offered faintly in the sudden decrease of the estimation of our securities in the English market, the price having receded nearly 1 per cent since last week; but, despite this danger and a reported further complication between England and Russia, as to their contiguous possessions in Central Wall street newsmonger) the clique were selling from 109% to 110 and down again. The current of speculation was furthermore rippled by Sunset Cox's Cuban belligerency resolution, forced on by the previous question, but voted down; and by Mr. Whitehouse's (so the Wall street bulletin had the gentleman's name) bull for an increase of three hundred and fifty millions in the legal tender currency.
